Objective: 6 months end of study internship in machine learning/AI research **When:** Spring/Summer 2026

Projects

Luth - KuraKura Blog — GitHub — Hugging Face

– Built and fine-tuned French LLMs with curated datasets and model merging, achieving SoTA French results with strong cross-lingual retention.

– Collaborated with **LiquidAI** to release a French fine-tuned version of LFM2 models: Luth-LFM2, first official "community" models.

Muon Clip GitHub

– Developed an implementation of the Muon optimizer in pytorch featuring the latest research advancements: QK-clipping, improved Newton–Schulz gradients orthogonalization with gradient matrix eigenvalue estimation, ZeRO 1 like distributed training ...

VLM GRPO GitHub

– Implemented GRPO training for VLMs, missing from existing frameworks.

– Integrated with TRL and Unsloth for seamless use and for multiple VLMs (Qwen, Gemma, LLaMA...).

– Collaborated with the **Unsloth team** to integrate this implementation into their framework.

Work Experience

Ampere - AI research intern | | Spring 2025 – 6 months

– Conducted research to develop a real-time model for high-level semantic understanding of road scenes, leveraging state-of-the-art vision-language models and reinforcement learning.

X&Immersion - ML research intern | | Spring 2024 – 3 months

– Developed and implemented an optimized AI model focused on emotional intelligence generation, using NLP and LLMs.

– Integrated the model into a real-time game engine (Unreal Engine), optimizing performance for in-game use.

Education

Ecole Polytechnique - Polytechnic Institute of Paris 2025 – present

MSc Data Science

***Relevant coursework**: Advanced AI for text and graphs (ALTEGRAD), Deep Learning, Machine Learning,Reinforcement Learning, Representation Learning, Generative models, Optimization & Cooperative optimization for data science.*

Politecnico di Milano 2024 – 2025

M2 Track Computer Science / AI

***Relevant coursework**: Data mining, Foundations of AI, Deep learning, Uncertainty in AI, Computer vision.*

Télécom SudParis - Polytechnic Institute of Paris 2022 – 2025

Master's degree – Mathematics and Computer Science

***Relevant coursework**: Machine learning and deep learning, data analysis, applied statistics and probabilities, optimization algorithms, computer vision, data mining.*

Skills & Interests

Programming Languages: Python, C, Bash, Java, Git
Frameworks: Pytorch, Transformers, Triton, Unsloth, TRL, Peft, vLLM, Numpy, Pandas, Scikit
Languages: French (native), English (C1), Arabic (A2)
Github Contributions: Unsloth, Axolotl, MergeKit, LightEval
Extracurricular: Rower (ex-French champion), 3D Artist, Guitar player
