

# Sinoué GAD

gadsinoue@gmail.com

 GitHub |  LinkedIn |  Website |  Hugging Face

**Objective:** Looking for an internship in machine learning/AI research

**When:** Spring/Summer 2026

## PROJECTS

---

### Luth - KuraKura

 GitHub —  Hugging Face

- Built and fine-tuned French LLMs with curated datasets and model merging, achieving SoTA French results with strong cross-lingual retention.
- Collaborated with **LiquidAI** to release a French fine-tuned version of LFM2.

### Muon Clip

 GitHub

- Developed an implementation of the Muon optimizer in pytorch featuring the latest research advancements: QK-clipping, improved Newton–Schulz gradients orthogonalization with gradient matrix eigenvalue estimation, ZeRO 1 like distributed training ...

### VLM GRPO

 GitHub

- Implemented GRPO training for VLMs, missing from existing frameworks.
- Integrated with TRL and Unsloth for seamless use and for multiple VLMs (Qwen, Gemma, LLaMA...).
- Collaborated with the **Unsloth team** to integrate this implementation into their framework.

## WORK EXPERIENCE

---

### Ampere - AI research intern

Spring 2025 – 6 months

- Conducted research to develop a real-time model for high-level semantic understanding of road scenes, leveraging state-of-the-art vision-language models and reinforcement learning.

### X&Immersion - ML research intern

Spring 2024 – 3 months

- Developed and implemented an optimized AI model focused on emotional intelligence generation, using NLP and LLMs.
- Integrated the model into a real-time game engine (Unreal Engine), optimizing performance for in-game use.

## EDUCATION

---

### Ecole Polytechnique - Polytechnic Institute of Paris

2025 – present

MSc Data Science

### Politecnico di Milano

2024 – 2025

M2 Track Computer Science / AI

*Relevant coursework: Data mining, Foundations of AI, Deep learning, Uncertainty in AI, Computer vision.*

### Télécom SudParis - Polytechnic Institute of Paris

2022 – 2025

Master's degree – Mathematics and Computer Science

*Relevant coursework: Machine learning and deep learning, data analysis, applied statistics and probabilities, optimization algorithms, computer vision, data mining.*

## SKILLS & INTERESTS

---

**Programming Languages:** Python, C, Bash, Java, Git

**Frameworks:** Pytorch, Transformers, Triton, Unsloth, TRL, Peft, vLLM, Numpy, Pandas

**Languages:** French (native), English (C1), Arabic (A2)

**Github Contributions:** Unsloth, Axolotl, MergeKit, LightEval

**Extracurricular:** Rower (ex-French champion), 3D Artist, Guitar player
